

NOTE: DIRECTION SLIDE SWITCH ON CIRCUIT BOARD MUST BE SLID IN DIRECTION **AWAY** FROM HINGES
****Remove cover from operator before beginning installation****

- May need to use a Parallel Mount "L" Bracket to Mount Arm Shoe -

Once operator is mounted as shown with arm parallel to the door jamb and the operator, RED DOT and RED SENSOR should be lined up causing RED LIGHT to come on when the operator is on. (refer to page 9 & 10 for diagram)
